WORK EXPERIENCE

Full Stack Development Internship

TCR INNOVATION

- Developed an e-commerce app using the MERN stack.
- Built interactive, responsive web pages using HTML, CSS, SCSS, SASS, and JavaScript.
- Integrated JavaScript libraries such as Splide.js for dynamic content.
- Created application pages and custom job application forms for client requirements.

Front-End Development Internship

IDEAMAGIX

- Transformed UI/UX designs into interactive web pages.
- Applied Bootstrap for consistent styling and layout.
- Designed and developed custom client pages.

Full Stack Development

Modern Aura (modernaura.in)

- Developed and deployed the company's professional website using Next.js.
- Added backend email functionality with Nodemailer.
- Integrated interactive maps for improved user navigation.
- [Live Website] (https://modernaura.in)

Full Stack Development Internship

GenexCorp   2 Months

- Developed driver and customer side APIs for "QuickTaxi."
- Built front-end pages including signup, login, and driver registration.
- Deployed the application on Vercel and collaborated on schema design and database management.
- Integrated front-end with backend services, resolving development bugs.
- Demonstrated strong proficiency in React components, adhering to project timelines.

PROJECTS

E-commerce Website

- Fully functional MERN stack-based e-commerce platform with user authentication, product listings, shopping cart, and checkout.

Transaction Manager

- Developed a Transaction Manager web application using Next.js for personal finance tracking.
- Implemented cash and online balance management with real-time updates based on transactions.
- Enabled category-wise filtering and monthly views for detailed financial insights.
- Integrated PDF and Excel export features for downloadable transaction reports.
- Added interactive charts to visualize income and expenses dynamically.
- Ensured a responsive and user-friendly UI for seamless use across devices.
- [Live Website] (https://transaction-manager-nine.vercel.app)

Stone Paper Scissor Game

- Simple game built with HTML, CSS, and JavaScript; includes score tracking.
- [Live Website] (https://tabishkhan03.github.io/stone-paper-scissor/)

Portfolio Website

- Designed and developed a personal portfolio website using Next.js to showcase skills, services, and projects.
- Featured sections like About, Services, Portfolio, and Contact for a complete professional profile.
- Integrated a responsive design ensuring accessibility across all devices.
- Highlighted projects and tech stack (MERN, Java, JavaScript) to attract potential clients and employers.
- [Live Website] (https://tabishkhan.vercel.app/)

ACHIEVEMENTS

- Winner of Code Execution Championship 2023
- Third Place in National Level Java Programming Competition
- Winner of Technoholic 2023
- Third Place in Web Development Competition
- First Place in Blind Coding Competition & Second in Web Development at Roobaroo event
- Third Place in Technowizz 6.0 2023
